IPDE-alpha rows use the August 3 fixed-prior results. U2: Lambda_T = 0.3; U3: Lambda_T = 1.0; both IPDE alphas equal the row value.

Oracle rows are the Cycle_Max = 1 AIDE results from the August 3 all-method table; mean IPDE patients = 0 by design.

IPDE-alpha rows use the August 3 fixed-prior results. U2: Lambda_T = 0.3; U3: Lambda_T = 1.0; both IPDE alphas equal the row value.

Oracle rows are the Cycle_Max = 1 AIDE results from the August 3 all-method table; mean IPDE patients = 0 by design.
